PRODUCT DESCRIPTION
One-part polyurethane sealant which swells in contact with water.

USES
Sealing:
- Construction joints
- Pipe and steel work penetrations through walls and floor slabs
- Swells in contact with water
  • Construction joints
  • Pipe and steel work penetrations through walls and floor slabs

CHARACTERISTICS / ADVANTAGES
- Easy to apply
- Good adhesion to various substrates
- Optimized expansion rate, therefore no damage to fresh concrete during curing
- Highly economical
- Swells in contact with water
- Permanently water resistant
- Adaptable to fit many different detail tasks
### PRODUCT DATA

**Form**

<table>
<thead>
<tr>
<th>Color</th>
<th>Oxide red</th>
</tr>
</thead>
<tbody>
<tr>
<td>Packaging</td>
<td>600 ml sausage (20 sausages/box, 48 boxes/pallet)</td>
</tr>
</tbody>
</table>

**Storage**

| Storage Conditions/ Shelf Life | 9 months from date of production if stored in unopened, undamaged original packaging in dry conditions at temperatures between +5°C and +25°C. |

**Technical Data**

<table>
<thead>
<tr>
<th>Chemical Base</th>
<th>1-part polyurethane, moisture curing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Density</td>
<td>1.33 kg/l (+23°C)</td>
</tr>
<tr>
<td>Skinning Time</td>
<td>2 hours (+23°C / 50% r.h.)</td>
</tr>
</tbody>
</table>
| Curing Rate     | After 1 day: ~ 2.0 mm (+23°C / 50% r.h.)  
                   After 10 days: ~ 10.0 mm (+23°C / 50% r.h.) |
| Sag Flow        | < 2 mm                               |
| Change of Volume| 1 day in tap water: < 25 %           
                   7 days in tap water: > 100 %       
                   Swelling properties in salty water will be reduced and delayed. |

**Mechanical / Physical Properties**

| Shore A Hardness | Swollen (7 days in tap water): > 10  
                   Non-swollen (7 days: +23°C / 50% r.h.): 40-60 |

**SYSTEM INFORMATION**

**Application Details**

<table>
<thead>
<tr>
<th>Substrate Quality</th>
<th>The substrate must be sound, clean, dry max. mat moist, free from all surface contaminants.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Substrate Preparation</td>
<td>All loose particles, release agents, laitance, paint rust and other poorly adhering materials must be removed by suitable hand or mechanical preparation techniques.</td>
</tr>
</tbody>
</table>

**Application Conditions/Limitations**

<table>

<tr>
<th>Substrate Temperature</th>
<th>+5°C min. / +35°C max.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ambient Temperature</td>
<td>+5°C min. / +35°C max.</td>
</tr>
<tr>
<td>Substrate Moisture Content</td>
<td>The substrate must be dry, max. mat moist.</td>
</tr>
</tbody>
</table>
Application Instructions

Application Method/Tools

As buried sealant for construction joint:
Use a triangular nozzle or cut the nozzle to obtain a regular triangular extrusion section and apply SikaSwell® S-2 according to the following table:

<table>
<thead>
<tr>
<th>Structure thickness</th>
<th>Size of triangular section</th>
<th>*Theoretical yield of 600 ml unipacs</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt; 30 cm</td>
<td>15 mm</td>
<td>6.2 m</td>
</tr>
<tr>
<td>30 - 50 cm</td>
<td>20 mm</td>
<td>3.6 m</td>
</tr>
</tbody>
</table>

*The actual yield can be lower than the theoretical yield depending on job-site conditions (substrate roughness, size of aggregates, etc.)

Place SikaSwell® S-2 in the centre of the concrete section.
Minimum cover to sealant on both sides must be 10 cm (reinforced concrete) or 15 cm (non reinforced concrete). For pouring heights < 50 cm allow sealant to harden for 2-3 hours. If the pouring height is > 50 cm, SikaSwell S-2 must harden for at least 2 days.
During concreting, compact well around SikaSwell S-2 to provide a dense concrete without any honeycombs or voids.

Cleaning of Tools
Clean application tools immediately after use. Hardened / cured material can only be removed mechanically.

Notes on Application / Limitations

SikaSwell S-2 expands in contact with water. This does not happen immediately, but slowly after a few hours. Nevertheless it is advisable not to leave SikaSwell S-2 any length of time in standing water (max. 24 hours as long as the water can drain away).
Do not use SikaSwell S-2 for movement joints!
If the water level suddenly increases the watertightness of joints will be achieved when SikaSwell S-2 has swollen.
In a totally dry state SikaSwell S-2 shrinks to its original dimensions, but expands again in contact with water.
Although SikaSwell S-2 has been tested to water pressures up to 5 bar, it is not recommended for sealing against water pressures higher than 2 bar because of the limited sealing distance. For pressures > 2 bar SikaSwell S-2 can be used to fix SikaFuko Swell 1 Injection Hoses or as a supplementary sealing measure for Sika Waterbars.

VALUE BASE
All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LOCAL RESTRICTIONS
Please note that as a result of specific local regulations the declared data for this product may vary from country to country. Please consult the local Product Data Sheet for the exact product data.
ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika’s current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika’s recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product’s suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
